Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

GENERAL INDEX

A

PAGE

Abortus, bacterium, further studies on, and related bacteria - - - 354

Acid and alkaline, simultaneous, bacterial fermentations from dextrose and salts of organic acids respectively - - - - - - - 188

Actinomyces-like granules of tonsils, streptococci in - - - - - 562

Actinomycetes, pathogenic, metabolism of - - - - - - - - 547

Agglutination tests, repeated, by Dreyer method in diagnosis of enteric fever in inoculated persons - - - - - - - - - - 126

Agglutinins, bacterial, in cold-blooded animals - - - - - 393

Agglutinins, for red corpuscles in cold-blooded animals - - - - 415

Alkaline and acid, simultaneous, bacterial fermentations from dextrose and salts of organic acids respectively - - - - - - - 188

Anaerobes, plate method for isolating - - - - - - - - 578

Anaphylactic shock and coagulation of the blood - - - - - 522

Animals, cold-blooded, bacterial, agglutinins in - - - - - - 393

Animals, cold-blooded, lysins and agglutinins for red corpuscles in - 415

Antibodies, liberation of, by foreign proteins - - - - - - 457

Antibody production, effect of exposure to cold on - - - - - 159

Antigenic properties of gelatin - - - - - - - - - - 139

Antipoliomyelitic horse serum, neutralizing properties of - - - 301

Antipoliomyelitic horse serum, protective properties of - - - - 309

Antipoliomyelitic serum, failure to obtain from horse - - - - 543

Antiseptics, action of certain toxic salts and alkaloids on bacteria and protozoa of intestine of rabbit - - - - - - - - - - 382

AYERS, S. HENRY, JOHNSON, WILLIAM T., JR., and DAVIS, B. J. The thermal death point and limiting hydrogen in concentration of pathogenic streptococci - - - - - - - - - - - - - - - 290

AYERS, S. HENRY, and RUPP, PHILIP. Simultaneous acid and alkaline bacterial fermentations from dextrose and the salts of organic acids respectively - - - - - - - - - - - - - - 188

B

B. aerogenes and B. coli, differentiation of, on eosin-methylene blue agar 43

B. aerogenes and B. coli types, distribution of, in polluted and unpolluted water - - - - - - - - - - - - - - - 90

B. aerogenes and B. coli types in water, relative viability of - - - 82

B. aerogenes and B. coli, employment of uric and synthetic medium for differentiation of - - - - - - - - - - - - - - 377
